

Pratum
Co-op

VITICULTURE SOLUTIONS AND SERVICES

An aerial photograph of a vast vineyard with rows of green grapevines stretching across the foreground. In the background, there are rolling hills, fields, and a red barn under a clear blue sky. A blue rectangular box with a white border is centered over the image, containing text and the company logo.

OUR MISSION

Dedicated to Innovative Solutions, Excellent
Service, and Long-Term Relationships.

Pratum
Co-op

WHO WE ARE

From precision tools to crop protection and cover crops, we offer complete and customized vineyard solutions.

In 1946, farmers in the community of Pratum, just east of Salem, founded a co-op to handle the prime seed produced in the Willamette Valley. Pratum Co-op became a trusted supplier of fertilizer, crop protection and energy products. More than 75 years later, each division has experienced steady growth and are continually developing innovative ways to better serve our customers. Our dedication continues in our service to vineyards.

- **Relationship-driven**—partnering with growers to form long-lasting relationships
- **Product expertise**—agronomists well-versed in the products we supply
- **Innovative solutions**—full line up of precision Ag tools and software
- **Custom application services**—soil amendments and drone spraying
- **Tailored cover crops**—Mountain View Seeds, a division of Pratum Co-op provides options to combat soil erosion and compaction, add vital nutrients, and reduce weed pressure
- **Excellent service**—we pride ourselves on professional and timely customer service
- **Co-op membership**—as a co-op member, you are an owner in the business and define its direction. You'll receive an annual patronage refund on what the cooperative earns, vote for the board of directors (or be on the board) and help with by-law changes.

VITICULTURE

Full range of agronomic services and products.

We carry a full range of high-quality crop nutrition and protection products. Our expert viticulturists have the right solutions for all of your needs including application services for soil health and wine grape quality.

We offer a variety of field and testing services, from on-site consulting and spraying to soil and tissue sampling.

- Full range of crop protection and nutrition products
- Bulk dry and liquid fertilizer and custom blends
- Custom field application of lime, gypsum and other amendments
- Pruning tools and twist ties
- Trellis equipment and supplies with industry partners
- Insect and disease scouting
- Pheromone traps and puffers
- Soil and tissue sampling with analysis, interpretation, and recommendations

DRONE APPLICATION

Taking innovation to new heights.

Whether you are looking to spray fungicides, insecticides, foliar nutrition, spread cover crops, or any other product labeled for aerial use, our drone spraying services get the job done with less soil compaction, crop damage, or wasted product!

Efficacy and safety are our top priorities. We are a fully trained, licensed and insured commercial applicator:

- Part 107, part 137 (61, 91)
- Class 3 medical card
- Nationally trained pilots
- Aerial applicators license
- Ongoing efficacy testing and research

**ENHANCED COVERAGE
AND PENETRATION
WITH SIX SPRAY ARMS**

NOZZLE FOR ADJUSTABLE
DROPLET SIZE**

**16 GALLON
TANK CAPACITY**

**LESS DAMAGE
MORE ACCESS**

MAX COVER CROP SEED

Max protection for your most valuable asset.

Cover crops manage soil fertility, soil quality, water, weeds, pests, diseases, and biodiversity. No single cover crop is best in all environments, so the use of blends and mixes are critical to success.

MAX TILTH formulated for optimum soil fertility and quality improvement. A mix of barley, oats, peas, clover and vetch. Offers biodiversity to access stored nutrients as well as increase organic matter in soil.

MAX TRAX is a mix of perennial ryegrass and fine fescues formulated for fast ground cover to mitigate soil erosion and water runoff. Its ideal for field borders and row middles that must tolerate frequent equipment traffic.

MOISTURE MONITORING

Real time data every four inches for water, nutrients and soil temperature.

Instantly monitor soil and crop health for all of your vineyards all from a user-friendly app or desktop. Collects useful soil data to make informed irrigation decisions and monitor overall vine health and water usage. With this data, you can determine if your vineyard is receiving the appropriate moisture to bring vital nutrients to the root zone.

- Measures soil moisture and soil temperature
- Salinity level in the root zone
- Various reading depths
- Season-long monitoring without extensive set up
- Fully serviced including trouble shooting
